Gold vs. Paper

Now it's proven that it takes more than stocks and bonds to build a rock-solid portfolio.

Considering how close the world has come to a total financial meltdown. It has never been more important to own physical gold to protect your portfolio against the shrinking U.S. dollar.

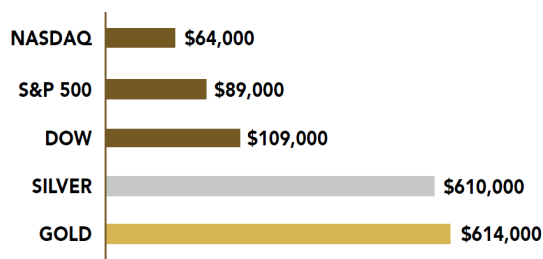

What does this mean? Physical gold provides Wealth Preservation and Portfolio Protection against the U.S. federal bailouts which make the U.S. dollar a depreciating asset. Hedge yourself for the next 5-10 years and get protection against inflation and the global bear market.
